

A CHECK AT EACH STAGE.

Quality protocol

Program summary | Prepared September 22, 2026

01 / Sample approval

Each lot is subject to pre-shipment sample approval. Grade and cup evaluation are checked against the agreed specification before shipment.

02 / Independent verification

The contracted program includes independent weight and quality certification at Mombasa, linked to the shipment documentation.

03 / Shipment protection

GrainPro or Ecotact hermetic liners are specified for every bag. Container preparation is documented prior to loading.

04 / Destination outturn

The applicable contract defines destination outturn protections, inspection procedures, notice periods and remedies. This summary does not create a separate guarantee or change the executed agreement.

05 / Documentation

FDA, USDA-APHIS, ISF and traceability requirements are part of the planned import process as applicable to each shipment. Final moisture limits, defect thresholds and cup notes must be confirmed by lot.
